

Brainstorming & Idea Prioritization Template

Date	15 March 2024
Team ID	
Project Name	Rising Waters
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Yasmin Shaik	Develop a machine learning model to predict floods using historical weather data.	Machine Learning	
2	Ameena Shaik	Build a Flask web application for flood prediction and early warning.	Web Application	
3	Chetan Reddy Sannapareddy	Use multiple algorithms (Decision Tree, Random Forest, KNN, XGBoost) and compare their performance.	Model Development	
4	Seethal Somisetty	Display flood prediction results through a simple dashboard for authorities.	User Interface	
5	Sufronia Ganta	Deploy the application on IBM Cloud for online accessibility.	Cloud Deployment	
6	Yasmin Shaik	Provide early warnings to help evacuation planning and	Disaster Management	

		disaster management.		
--	--	-------------------------	--	--

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Develop a machine learning model for flood prediction using weather data.	High	High	1	Yes
2	Create a Flask web application to display flood prediction results.	High	High	2	Yes
3	Deploy the system on IBM Cloud for real-time access and disaster management.	Medium	High	3	Yes
